## PROJECTS

### DESIGNER TASK MANAGEMENT APPLICATION

TECHNOLOGIES: Angular, NgRx, RxJs, Angular Material, Swagger  
A web application exclusively for designers at SES. This is used to upload files and medias to keep track by their leads their work or progress. Similar applications would be AzureDevOps and Trello

### VIDEO EDITOR WEB APPLICATION

TECHNOLOGIES: Angular, RxJs  
A simple video editor that allows you to cut, add video, add texts, and publish it through JSON file. Once this is published, this can be uploaded to the designer task Management application.

### SEARCH ENGINE MOBILE AND WEB APPLICATION

TECHNOLOGIES: Angular, RxJs, Angular Material  
A mobile and web e-learning search engine application that allows users to search terms related to Hospitals/Care centers/Medical Care. Similar of which is Google Search Engine.

### E-LEARNING MOBILE AND WEB APPLICATION

TECHNOLOGIES: Angular, NgRx, RxJs, Angular Material, Swagger  
An adaptive eLearning tool that allows individuals to learn interactive exercises. Each exercises is accompanied with explanatory images, texts, and animations which makes the educational process more effective to improve the user's subject comprehension.

### ESL ONLINE TUTORING SCHOOL ANDROID APPLICATION

TECHNOLOGIES: Android Java  
An ESL Online Tutoring Android Application that allows students and teachers to learn English from one another. It provides full flexibility and many benefits to teachers and students along with easy-to-use platform for online English lessons.
